### To be eligible one or more of the following must be met

- assessment documentation shows persistent difficulties in the acquisition of pre-academic skills such as recognition of letters and numbers in the early primary years; **and/or**
- assessment documentation shows persistent difficulties in spite of remedial intervention in the acquisition of reading, writing and/or arithmetic skills; **and/or**
- assessment documentation shows significant discrepancy between estimated learning potential and academic achievement (not discrepancy between verbal and performance abilities) as measured by norm-referenced achievement instruments.

### One or more academic difficulties relative to expected ability, and identified in documentation:

- Word Recognition, and/or
- Reading Comprehension, and/or
- Spelling, and/or
- Written expression, and/or
- Mathematical computations, and/or
- Problem Solving

Various achievement instruments and cognitive tests can be used to document difficulty.

There is documented evidence that...

- Average or above ability, is demonstrated by either by a cognitive assessment or by average or better performance on a norm referenced test of achievement in reading comprehension, mathematics problem solving, or written expression (average is demonstrated by score(s) at or above one standard deviation below the norm).
- Significant weakness exists in one or more of the cognitive processes relative to overall functioning.
- Assessments of cognitive processes must utilize norm-referenced instruments; if other forms of assessment are used, they must be accompanied by a clear rationale for why the alternate assessment is appropriate in identifying the student's processing disorder.
- Assessment documents indicate that the difficulties being experienced are not primarily\* due to sensory deficits, lack of opportunity to learn, cultural or linguistic differences, or social/emotional/physical health issues.

\* Learning disabilities may coexist with other disorders such as behavioural or emotional disorders, sensory impairments, or other medical conditions.

### Measures used as evidence of cognitive functioning:

- Full scale score, or other norm referenced estimate of ability with rationale for not using full scale IQ.
- Verbal IQ or Performance IQ score
- Test of non-verbal cognitive ability score
- Norm-reference test(s) of academic achievement in reading comprehension, mathematics problem solving, or written expression.

### Significant weakness in one or more cognitive processes, relative to overall functioning:

- Perception
- Memory
- Attention
- Language processing
- Visual-spatial processing
- Planning and decision making
- Phonological processing
- Processing speed
- Auditory processing

### Examples of evidence of other primary sources of difficulty addressed in assessment documentation (✓ as appropriate):

- Culture and language differences of the home
- Consistency of schooling and attendance
- Vision and hearing screening results
- Medical factors regarding social/emotional/physical health
- Other

Documentation includes:

- a behavioural assessment and/or
- a mental health assessment

The behaviour or mental health assessment indicates evidence of **one or both** of the following:

- antisocial, extremely disruptive behaviour in most other environments and consistently/ persistently over time; **and/or**
- severe mental illness diagnosed by a mental health professional (psychiatrist, paediatrician, physician, registered psychologist specializing in this area).

There must be documentation to support that the student has been appropriately assessed and identified by the school district as meeting the criteria of the special education category.

- Functional behavioural assessment, for example, the Behaviour Disorders Instructional Support Planning Tool, **and/or**
- Other assessments by medical professionals or teams of professionals, **and/or**
- Norm referenced assessment, i.e., Behaviour Assessment System for Children (BASC), Connors' Rating Scale, Achenbach Child Behavior Checklist, etc.

There is documented evidence that indicates...

- The behaviour
  - places student or others at serious risk and/or
  - interferes with his or her academic progress and that of other students.

There is documented evidence that ...

- A current IEP is in place, dated after September 30, previous school year.
- The IEP has individualized goals and measurable objectives, with adaptations and or modifications where appropriate, and strategies to meet these goals.
- The goals correspond to the category in which the student is identified.
- The student is receiving special education services to address the needs identified in the assessment documentation that are beyond those offered to the general student population and are proportionate to level of need.
- The student is being offered learning activities in accordance with the IEP.
- The IEP outlines methods for measuring progress in relation to the IEP goals.
- A parent was offered the opportunity to be consulted about preparation of the IEP.
